

“I fought to test drinking water in schools because the health of our children is too important to risk. ”

-Assemblyman

FRED W. THIELE, JR.

Assemblyman **Fred W. Thiele, Jr.** is making sure the water in our schools is safe to drink

The law will:

- Require lead testing in schools with older pipes on a periodic basis
- Help school districts pay for testing and remediation to ensure the water is safe
- Notify parents in a timely manner if lead is found and provide safe drinking water to students and staff (A.10740).

Thiele also fought for a \$1.4 billion increase in education aid for a total of \$24.7 billion – the largest investment in New York history.
