

*It's time to get
serious about the cost
of electricity on
Long Island*

*Assemblyman Graf
has a real plan for LIPA*

LET'S GET SERIOUS

Assemblyman Al Graf has a plan to fix LIPA.

- 💡 Reduce costs to drive down rates by forgiving LIPA of debt resulting from unfunded state mandates;
- 💡 End price-gouging on Long Island by preventing the New York Power Authority (NYPA) from charging municipalities or regions different prices per kilowatt of electricity;
- 💡 Prevent blackouts like those we suffered after Superstorm Sandy by moving power lines underground;
- 💡 Stop further bill increases by repealing the 2013 LIPA overhaul legislation; and
- 💡 Explore the feasibility and benefits of creating smaller, municipal electric companies here on Long Island.

Call your Senator and tell them to support Assemblyman Graf's bill A.8127.
