

ASSEMBLYMAN JOSEPH SALADINO FIGHTING TO PROTECT US

*Safe Communities. Safe Families.
Protecting us from Criminals and Sex Offenders*

Expanded DNA database will help catch more offenders

Assemblyman Saladino has fought for and **was successful** in creating a new system for **keeping you and our communities safe**.

Assemblyman Joseph Saladino worked with our New York State Senators and Long Island Assembly Members to **get the job done** for you and your family.

The **DNA database** is an important tool that will result in more convictions, **keeping dangerous, violent felons and sexual predators behind bars** where they belong.

Under the new law, DNA samples are **collected from ALL convicted felons** and serious offenders. At the same time, the new system will also go a long way to help free innocent people who have been wrongly convicted.

The expanded DNA database is the **first of its kind in the nation!** And Assemblyman Saladino is proud to have helped make it happen!

Assemblyman Joseph Saladino stands with Senate Majority Leader Dean Skelos and law enforcement to help push for this important law to protect communities.
