Save the Subways and Clean up the MTA!

Governor Paterson:

We, the undersigned, call upon you to protect the public transportation that is the lifeblood of New York City. Safe, reliable, and affordable transportation is critical to the functioning of our city. The Metropolitan Transit Authority (MTA) has repeatedly and consistently squandered public money while escaping accountability. The MTA should be reined in, held to standards of transparency and public accountability, and prevented from squandering the funds they receive from the recent bailout. We are calling on you to:

1. Support stable, fair sources of revenue for New York City's public transit that do not create new tolls or increase transit fares.
2. Prevent future service cuts.
3. Demand the MTA submit to full independent forensic audits and fully disclose its finances to the public.
