A new path to high school graduation

- Assemblyman Brindisi is fighting to create a Career and Technical Education (CTE) diploma to give students the opportunity to learn a specific trade in high-demand areas, like manufacturing and IT development, before graduation.

Improving access to advanced manufacturing training

- By providing state funding for training and certification, we can offset training costs for local employers and better prepare our workforce for quality jobs right here in the Mohawk Valley.

Did you know?

- On average, manufacturers and technicians receive better benefits and earn higher salaries than those working in other industries.¹
- Starting salaries are often between \$45,000 and \$50,000.²
