

**New Solutions for Our
Children's Education**

JOHN
Ceretto
STATE ASSEMBLYMAN

Mandatory Full-Day Kindergarten -

Studies show that the earlier a child begins their education, the more successful they will be later in life.

Trade Schools -

High school students should be encouraged to pursue trades such as welding, machining, and electrical work, which have good job prospects.

Empowering Teachers -

Curriculums should provide teachers flexibility to make creative lesson plans, as opposed to teaching to a test.

Encouraging Parents -

Schools are a supplement to the work parents do in raising their kids. This partnership should be encouraged and strengthened.

Increased State Aid -

Ceretto secured an increase in state education funding for every school in his district in the 2013 budget.

\$10,000 College Degree -

A new, merit-based plan to provide an affordable college education at SUNY schools to New York students.
