

STOP The Common Core Experiment!

ASSEMBLYMAN

DiPIETRO**

End Common Core Now

As a father and legislator, what I have seen throughout the implementation of this Common Core curriculum has been revolting. We must stop this program today and work toward returning local control to our schools.

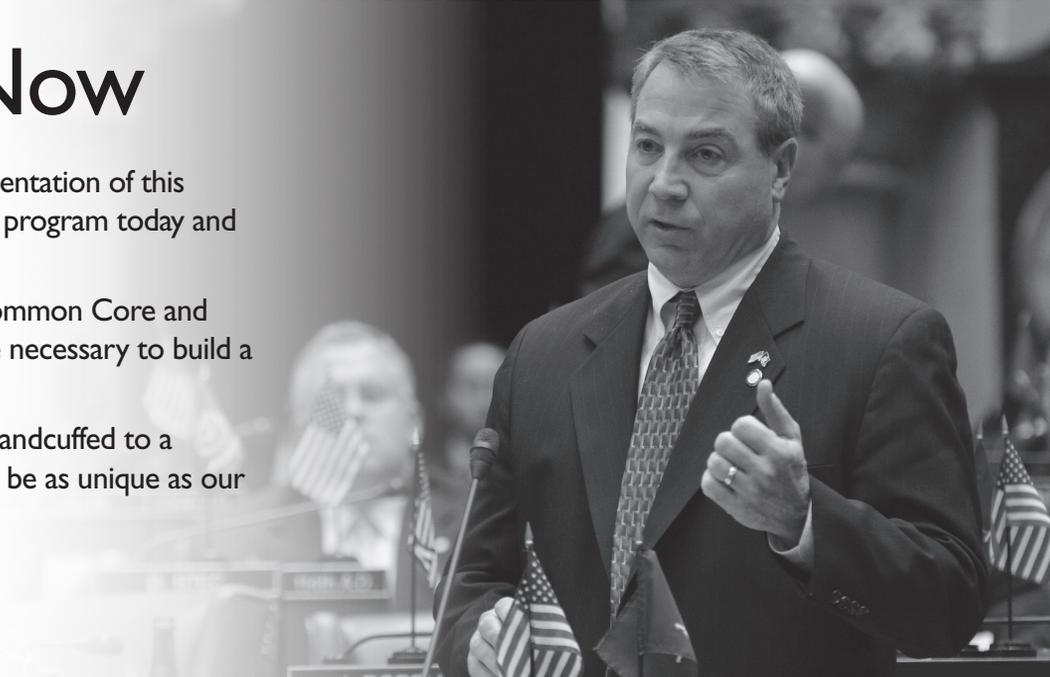

I sponsor a bill that would institute a two-year moratorium on Common Core and would stop all aspects of the program. This bill affords us the time necessary to build a consensus on a teacher-centric education policy.

Our teachers can't teach and our students can't learn if they are handcuffed to a curriculum that isn't suited for them. Our curriculum deserves to be as unique as our students. One size does not fit all.

Contact my office so we can fight together against Common Core and free our education system.
