“Fighting for Western New York!”

The 2012 Legislative Session created a brighter future for Western New York, as the state's economy is finally moving in the right direction.*

*According to the U.S. Chamber of Commerce, the world's largest business organization.

- New York State moved up 11 spots to become a top 10 performing state, based on factors like job growth and livability;
- We are fourth in economic output per job nationwide;
- We are ninth in per-capita personal income growth over the last decade; and
- Our private colleges and universities have expanded rapidly, adding 55,000 jobs.

In 2013, let's shine the light on:

- Driving down local taxes and improving services by eliminating costly, unfunded mandates; and
- Strengthening the institutions that make Western New York great like our schools, higher education institutions and agricultural communities.
