NEW YORK STATE ASSEMBLY

**Andrea has an
inflation relief plan**

New Yorkers Deserve A Break

That's why I support these proposals:

A.0653

Would stop local governments from banning utility hookups based on the type or source of energy being used.

A.6260

Requires New York to study the costs and benefits of renewable energy systems compared to other ways of generating electricity, helping guide smarter energy decisions for our state.

A.4017

Would prevent credit and debit card companies from charging interchange fees on the tax and fee portions of a transaction.

A.2392

Creates a tax credit program to help child care providers improve and expand access to quality child care in New York.

A.2373

Would require a cost analysis of child care expenses by region and directs local social services to use those results when providing subsidies.
