Testimony of Tioga Opportunities, Inc. Submitted to the New York State Joint Housing Budget Hearing

February 23, 2026

Chair Krueger, Chair Pretlow, and Members of the Legislature:

My name is Christine Shaver, and I am the Executive Director of Tioga Opportunities, Inc., the Weatherization provider serving Broome and Tioga Counties. We appreciate the opportunity to submit testimony regarding the FY 2027 Housing Budget.

Tioga Opportunities, Inc. strongly supports the joint testimony submitted by NYSWDA, the Association for Energy Affordability, and NYSCAA. We write to reinforce the urgent need to **restore and protect funding for the Weatherization Assistance Program (WAP) in the Fiscal Year 2027 Budget.**

About the Weatherization Assistance Program

For decades, a majority of Weatherization in New York State has been funded through the consistent federal-state framework in which 10% of Home Energy Assistance Program (HEAP) funds are allocated to the Weatherization Assistance Program (WAP). This allocation is not discretionary; it is critical to the State's ability to deliver permanent, energy-related cost savings (and health and safety) measures to the homes of the local low-income families in our community. For our agency, the diversion of these funds represents a 60 percent reduction in available resources, fundamentally undermining our ability to sustain operations and deliver essential weatherization services.

What Weatherization Means in Our Community

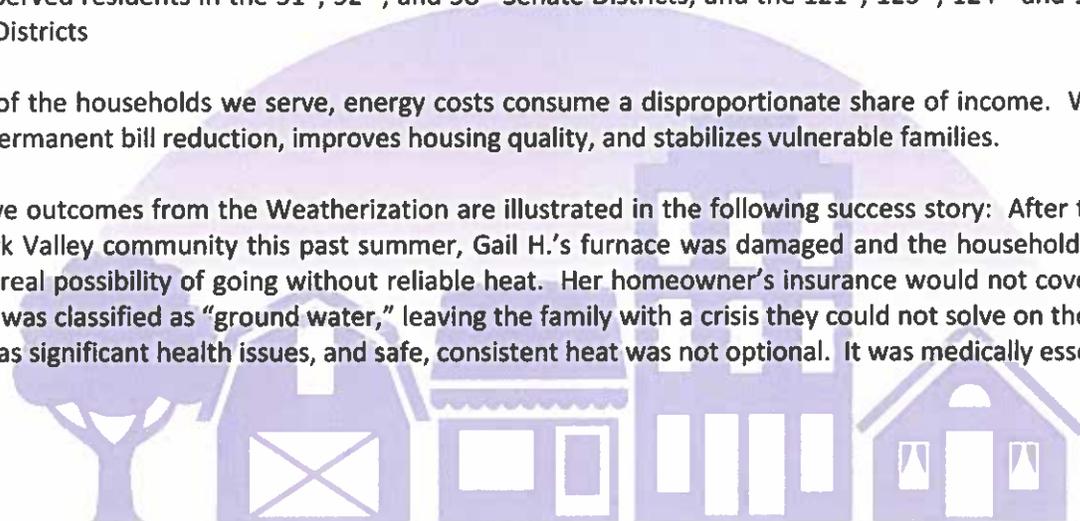

Weatherization is a federally authorized program that reduces energy costs for low-income households by improving home energy efficiency, ensuring safe heating systems, and addressing health and safety hazards.

Last year, our agency:

- Served 74 households with nearly 100 individuals experiencing improved health and safety
- Leveraged \$658,327 of federal and state funding with HEAP dollars to best serve customers
- Employed 15 staff and utilized two local contractors
- Served residents in the 51st, 52nd, and 58th Senate Districts; and the 121st, 123rd, 124th, and 131st Assembly Districts

For many of the households we serve, energy costs consume a disproportionate share of income. Weatherization provides permanent bill reduction, improves housing quality, and stabilizes vulnerable families.

The positive outcomes from the Weatherization are illustrated in the following success story: After the flooding in the Newark Valley community this past summer, Gail H.'s furnace was damaged and the household was suddenly facing the real possibility of going without reliable heat. Her homeowner's insurance would not cover the damage because it was classified as "ground water," leaving the family with a crisis they could not solve on their own. Gail's husband has significant health issues, and safe, consistent heat was not optional. It was medically essential.

Through the Weatherization Program, staff were able to repair the furnace and weatherize the home, stabilizing the heating system and reducing heat loss so the family could stay warm through cold weather.

The Impact of HEAP Funding Loss

Without the HEAP Funding designated to WAP, our Weatherization program will become unsustainable. It will force us to:

- Lay off our highly trained building science professionals
- Disrupt our contractor networks built over decades
- Increase energy burden for our low-income residents
- Greatly reduce the number of families we serve
- Consider ending the essential federally mandated Weatherization Assistance Program services we provide in our area.

This funding represents the majority of our annual operating capacity. Cuts would not be temporary — they would dismantle infrastructure that has taken decades for us to build.

We respectfully urge the Legislature to:

Restore and protect the 10 percent HEAP Weatherization Assistance Program (WAP) allocation through Social Services Law § 97(5) in the Fiscal Year 2027 Budget.

Weatherization is one of the most cost-effective housing stabilization tools available. It permanently lowers utility costs, reduces arrears, prevents displacement, and strengthens communities across New York. For our organization, this translates into measurable, lasting affordability improvements for the households we serve—reducing crisis interventions and helping families, people with disabilities, and seniors remain safely in their homes.

We respectfully urge restoration of the 10 percent HEAP weatherization set-aside in the final FY 2026–27 State Budget. Thank you for your consideration and continued leadership on housing stability and affordability.

Respectfully submitted,

A handwritten signature in blue ink, appearing to read "Christine Shaver", is written over a light blue circular background.
